

Simplified Building Performance Dashboard

EnergyPrint's Utility Dashboard puts key building performance information at your fingertips. We input complex, unintuitive monthly utility bills and turn them into actionable business insight with simple, cloud-based energy management software. At a macro level, you will identify efficiency opportunities and prove ROI.

Whether you're exploring one building or large portfolios, the Utility Dashboard uses utility data to answer four key business questions.

How are buildings doing?

Are they getting better or worse?

Where are the best opportunities for savings?

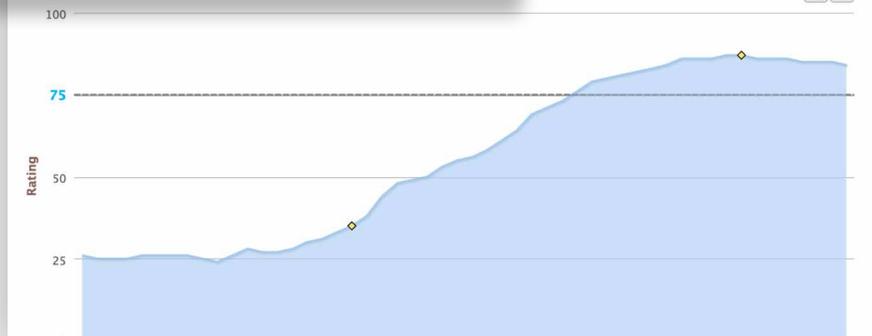

Have past improvements paid off?

How are your buildings doing?

Assess building performance with simple metrics and benchmark your building against itself, its peers and ENERGY STAR Portfolio Manager®. We take away the guesswork and point out current, relevant and accurate building performance metrics.

ENERGY STAR PARTNER Energy Performance Rating 84*

ENERGY STAR Trends

Are buildings getting better or worse?

Prioritize where to focus attention by tracking how your energy use and expense changes over time, varies with weather patterns and responds to modifications to operations and equipment modifications. Quickly sort your properties to highlight your best performers and identify the greatest opportunities.

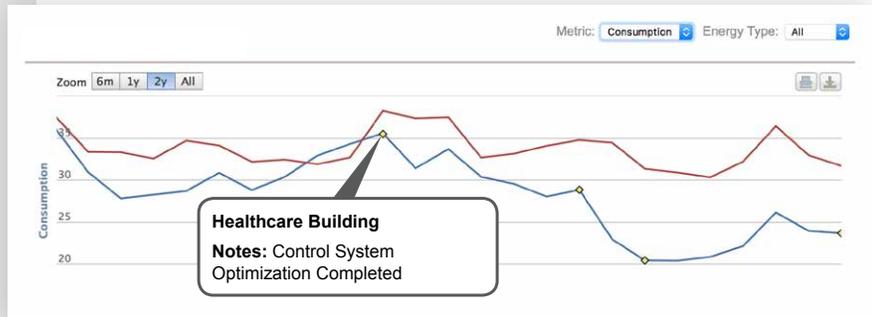

Portfolio Overview

Name	Current Through	Cost /SF	Cost % Change	Consumption /SF	Consumption % Change
Office - Opportunity compared to BAS Success ⚠️	11/2016	\$2.12	2.2% ↑	137.48	10.1% ↑
Office - BAS Success	11/2016	\$1.76	9.5% ↑	87.56	6.0% ↑
Office - Energy Services Success ⚠️	12/2016	\$1.76	-0.6% ↓	150.88	2.4% ↑
K12 - HVAC Upgrade Success ⚠️	12/2016	\$1.61	-0.4% ↓	106.21	0.3% ↑
Healthcare - Opportunity compared to HVAC Success ⚠️	12/2016	\$3.68	-2.5% ↓	294.15	-5.3% ↓
K12 - BAS Success ⚠️	12/2016	\$1.24	-5.8% ↓	67.89	-6.3% ↓
K12 - Energy Services Success ⚠️	11/2016	\$1.55	-3.8% ↓	71.78	-6.9% ↓

Where are the best opportunities for savings?

Implement solutions that truly change building performance and reverse negative trends. Drill into specific properties for deeper energy performance intelligence. Create benchmarks based on regions, property type, square footage and more.

Peer Comparisons

Have past improvements paid off?

Measure efficiency projects and prove financial results. Know the impact of every investment, large or small, and leverage utility data to find even more ways to improve. By setting a baseline and tracking data, you can report on both billed and weather normalized energy performance.

Cost Avoidance
